

# MUMBLING THOM (SHAMANIC POP-FOLK)

Italian-Swiss singer-songwriter, multi-instrumentalist, producer and videographer **MUMBLING THOM** invites you on a powerful and solar journey.

Deeply influenced by North American philosophy and the realistic writers of the post-war period (John Fante, Bukowski), **MUMBLING THOM** develops songs that are between dreamlike tales and societal chronicles, peopled by the voices of old male Lakota medicine men and others left behind by the American Dream.

An electro-acoustic and shamanic pop, invigorating, committed and generous, to be discovered on CD and on stage.
